EDUCATION

The University of Texas at Dallas, Richardson, TX **May 2028**
Bachelor of Science, Mechanical Engineering

TECHNICAL SKILLS

Design Software: SolidWorks, CREO Parametric, AutoCAD, Inventor, Fusion 360, OnShape, Adobe Illustrator
Programming Languages: MATLAB, C
Manufacturing Skills: CNC Machining, 3D Printing, Woodworking

WORK EXPERIENCE

Student Worker – **The University of Texas at Dallas** February 2026 – August 2026

- Managed day-to-day operation of open-access 3D printers, delivering slicing software support, troubleshooting print failures, and performing routine maintenance for reliable use
- Ensured safe operation of CNC lathes, drill presses, and shop equipment by enforcing PPE compliance, guiding users, and maintaining an organized workshop environment

Undergraduate Researcher – **RIDE** August 2025 – May 2026

- Co-authored a research paper on robotic-arm 3D bioprinting techniques for low-cost biofabrication
- Drove research into low-cost 3D bioprinting technologies, focusing on accessibility and scalability to meet growing demand for engineered tissue models and translational biofabrication
- Developed a proprietary robotic arm–based 3D printing method to enable complex, angled geometries

CLUBS/PROJECTS

Custom Quadcopter Autonomous UAV – **Independent Personal Project** July 2026 – Present

- Engineering a custom 7" quadcopter testbed in SolidWorks, designing a 3D printed airframe optimized for structural integrity under motor thrust loads to validate autonomous flight systems
- Configuring ArduCopter firmware and Mission Planner to implement autonomous flight capabilities including waypoint-based missions, GPS position hold, and failsafe-triggered Return to Launch

Vice President – **AIAA UTD** December 2025 – August 2026

- Co-lead the largest engineering organization at UTD, managing around 250 members across 10 interdisciplinary research projects and directing three international competition teams
- Spearheaded partnerships with university administration to secure funding, facilities, and institutional resources, strengthening long-term support for student-led engineering organizations

Mechanics, Design Build Fly – **Comet Aviation, AIAA UTD** May 2025 – August 2026

- Led fuselage development within a multidisciplinary team, designing a 5-ft wingspan RC aircraft for the AIAA Design Build Fly competition, capable of carrying substantial payload
- Drove rapid design iteration through hands-on composite fabrication (carbon fiber, fiberglass) and 3D printing to prototype, test, and refine structural and supporting components

Mechanics, CAD Specialist – **Comet Aerobotics, AIAA UTD** February 2025 – August 2026

- Delivered full-cycle CAD modeling and animation to visualize motion, assembly interactions, and system behavior for an autonomous lunar rover competing in NASA's Lunabotics competition
- Delivered detailed engineering drawings and machined custom components for the rover, built to excavate lunar regolith simulant per NASA specifications

ADDITIONAL INFORMATION

Certifications: Adobe Certified Professional in Visual Design, Autodesk Fusion 360 Certified User, Autodesk Inventor Certified User, Certified SOLIDWORKS Professional

Awards: Service Leadership Society (SLS) Leadership Alumni Award, Comet Aerobotics "Duct Tape Saves Lives" Award, AIAA UTD Collaborative Excellence Award
